

Equestrian training with

Ridely Academy

- **Drive forward** student learning with streamlined communication in your exclusive branded space.
- **Easily share** training tips, announcements, and motivational guidance, advancing student skills and passion.
- This ensures comprehensive student support and **optimizes your time**, allowing you to focus on what truly matters.
- With personalised learning journeys tailored to each student's pace and a vast content library to supplement your teaching, you **empower students to excel on their terms** while meeting the standards you set.

🎓 What your students gain

- ✔️ Build **strong knowledge bases** and get accurate answers quickly
- ✔️ Access to **25+ training programs** and **500+ exercises** from expert trainers across various disciplines and topics
- ✔️ Engage in training discussions and efficient communication in an **equestrian-focused and safe space**
- ✔️ **Track progress** with goal-setting tools, training stats, progress monitors and achievement badges
- ✔️ Unlimited access to features and content daily. **Learn on the go, wherever you are**

Benefits for you

✔ **Personalised learning**

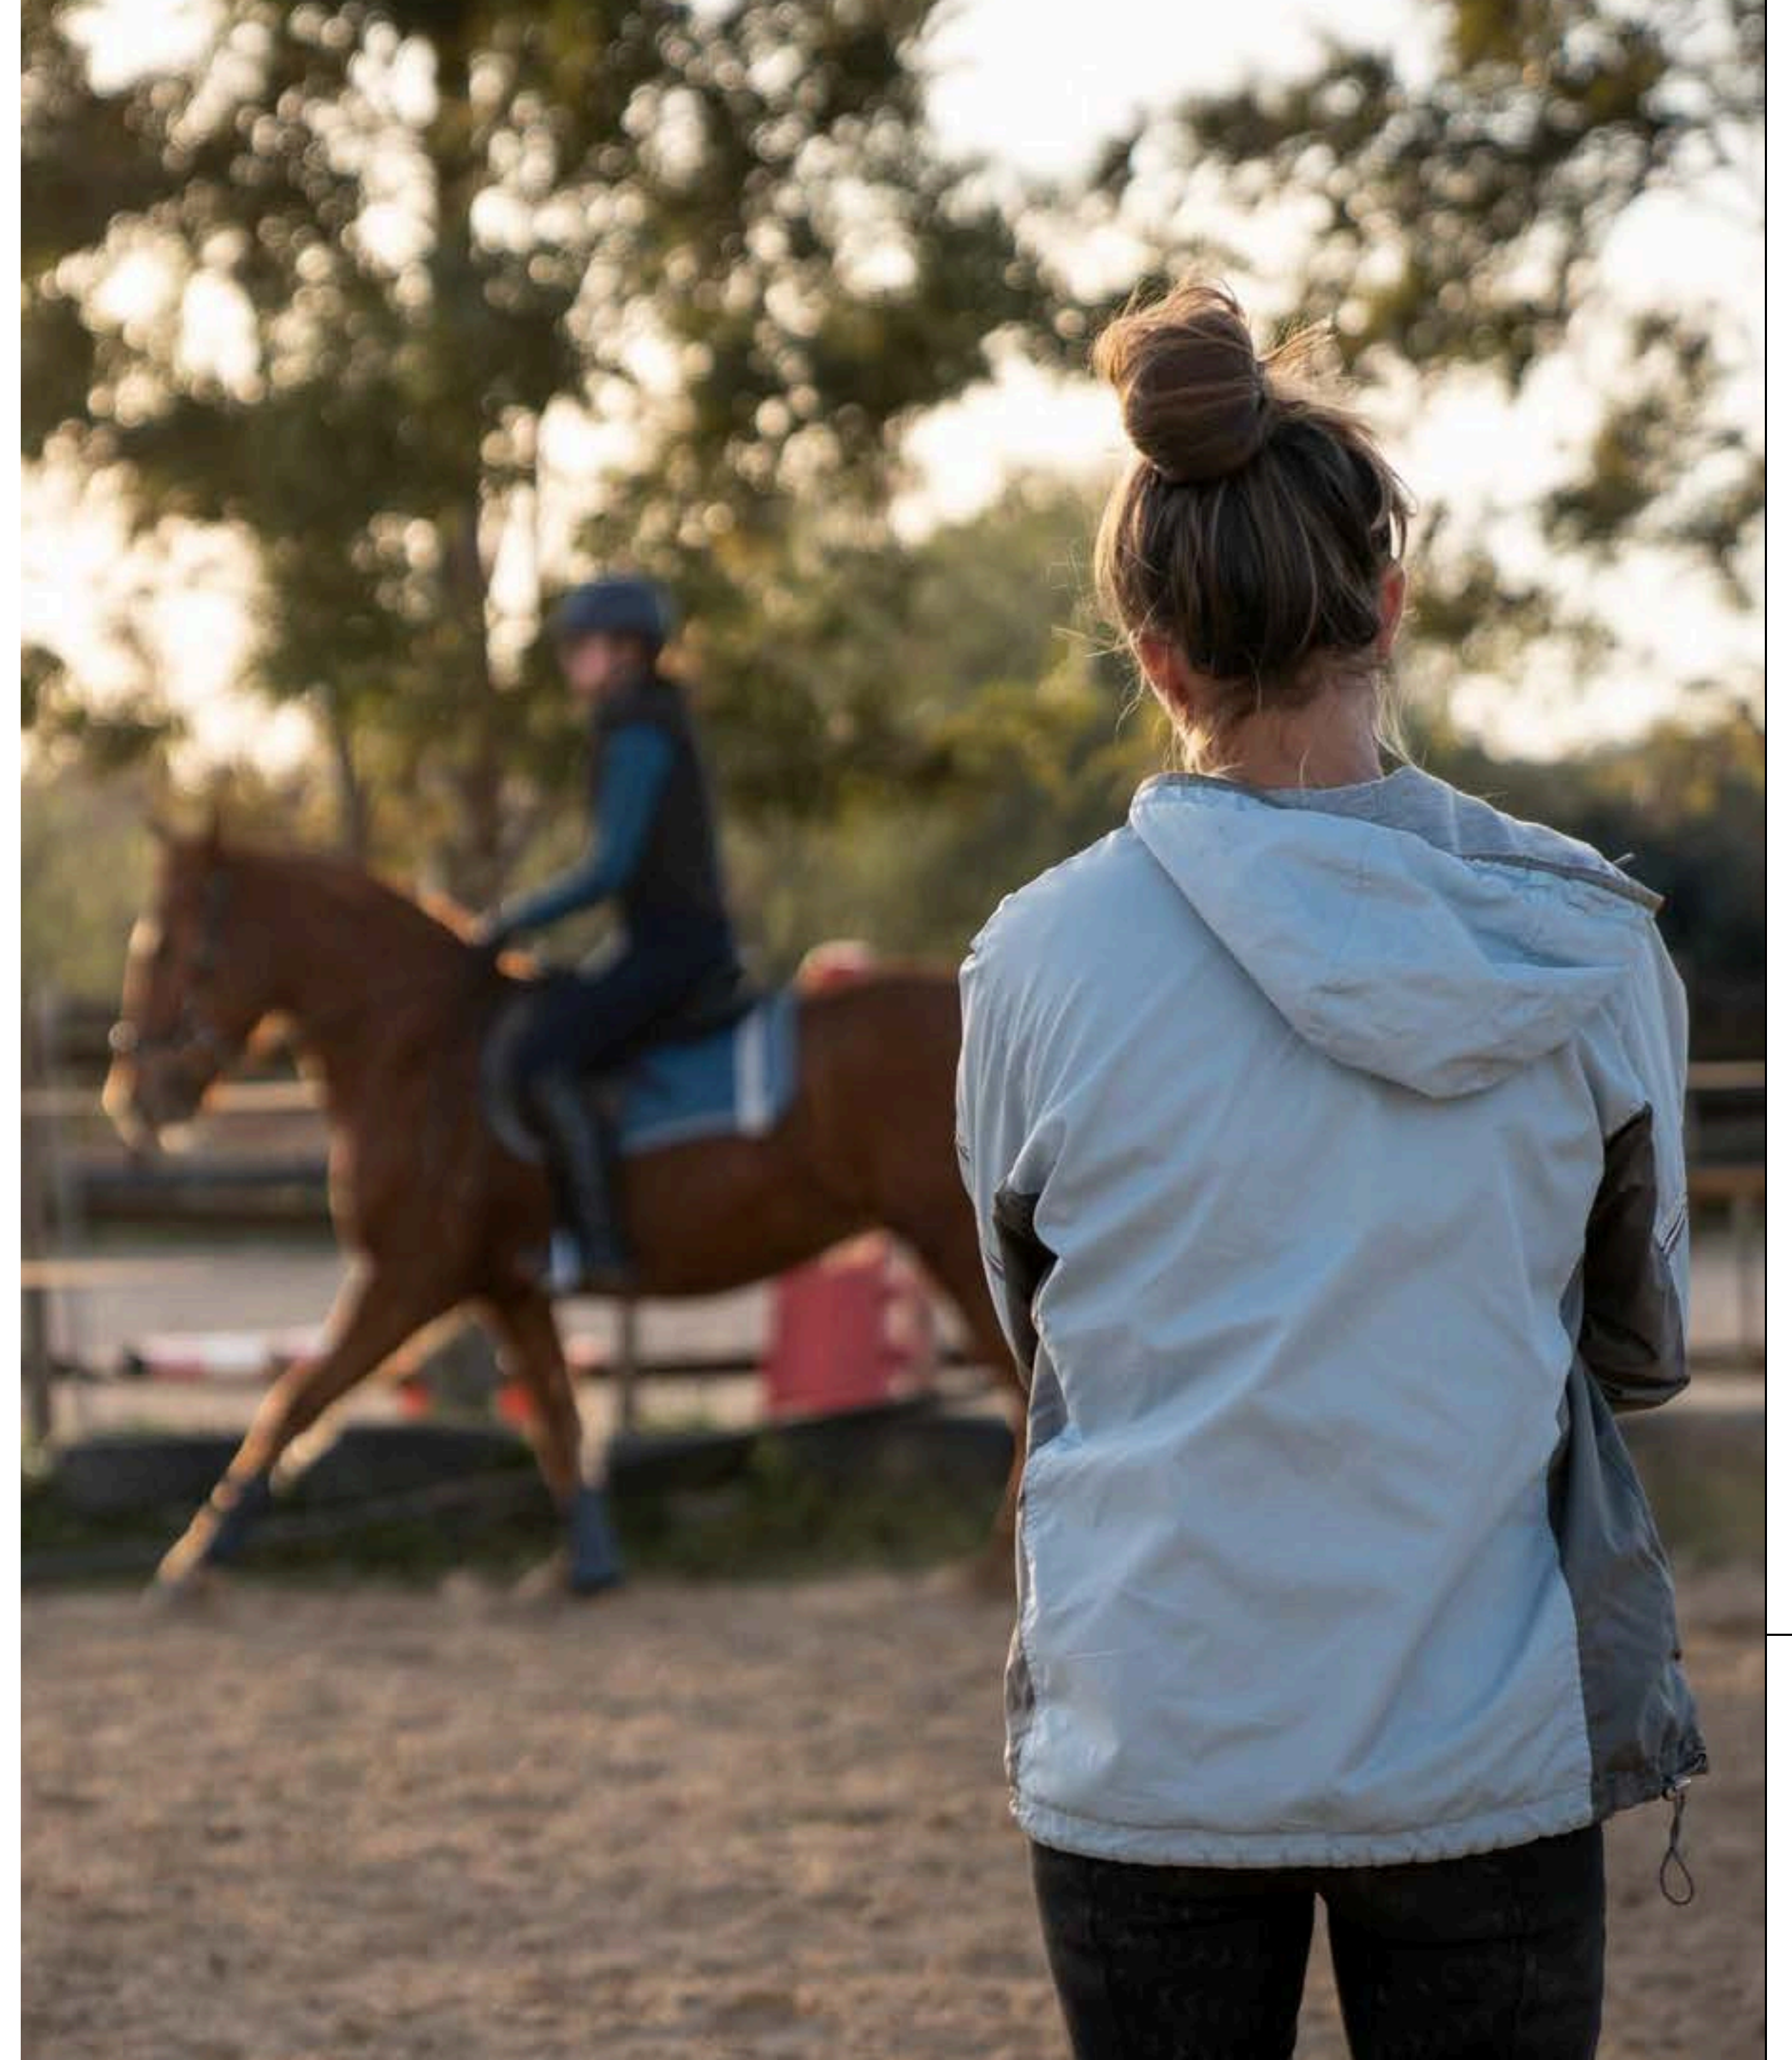

Allow your students to practice at their own pace, first filling in gaps in their understanding and then accelerating their learning in person.

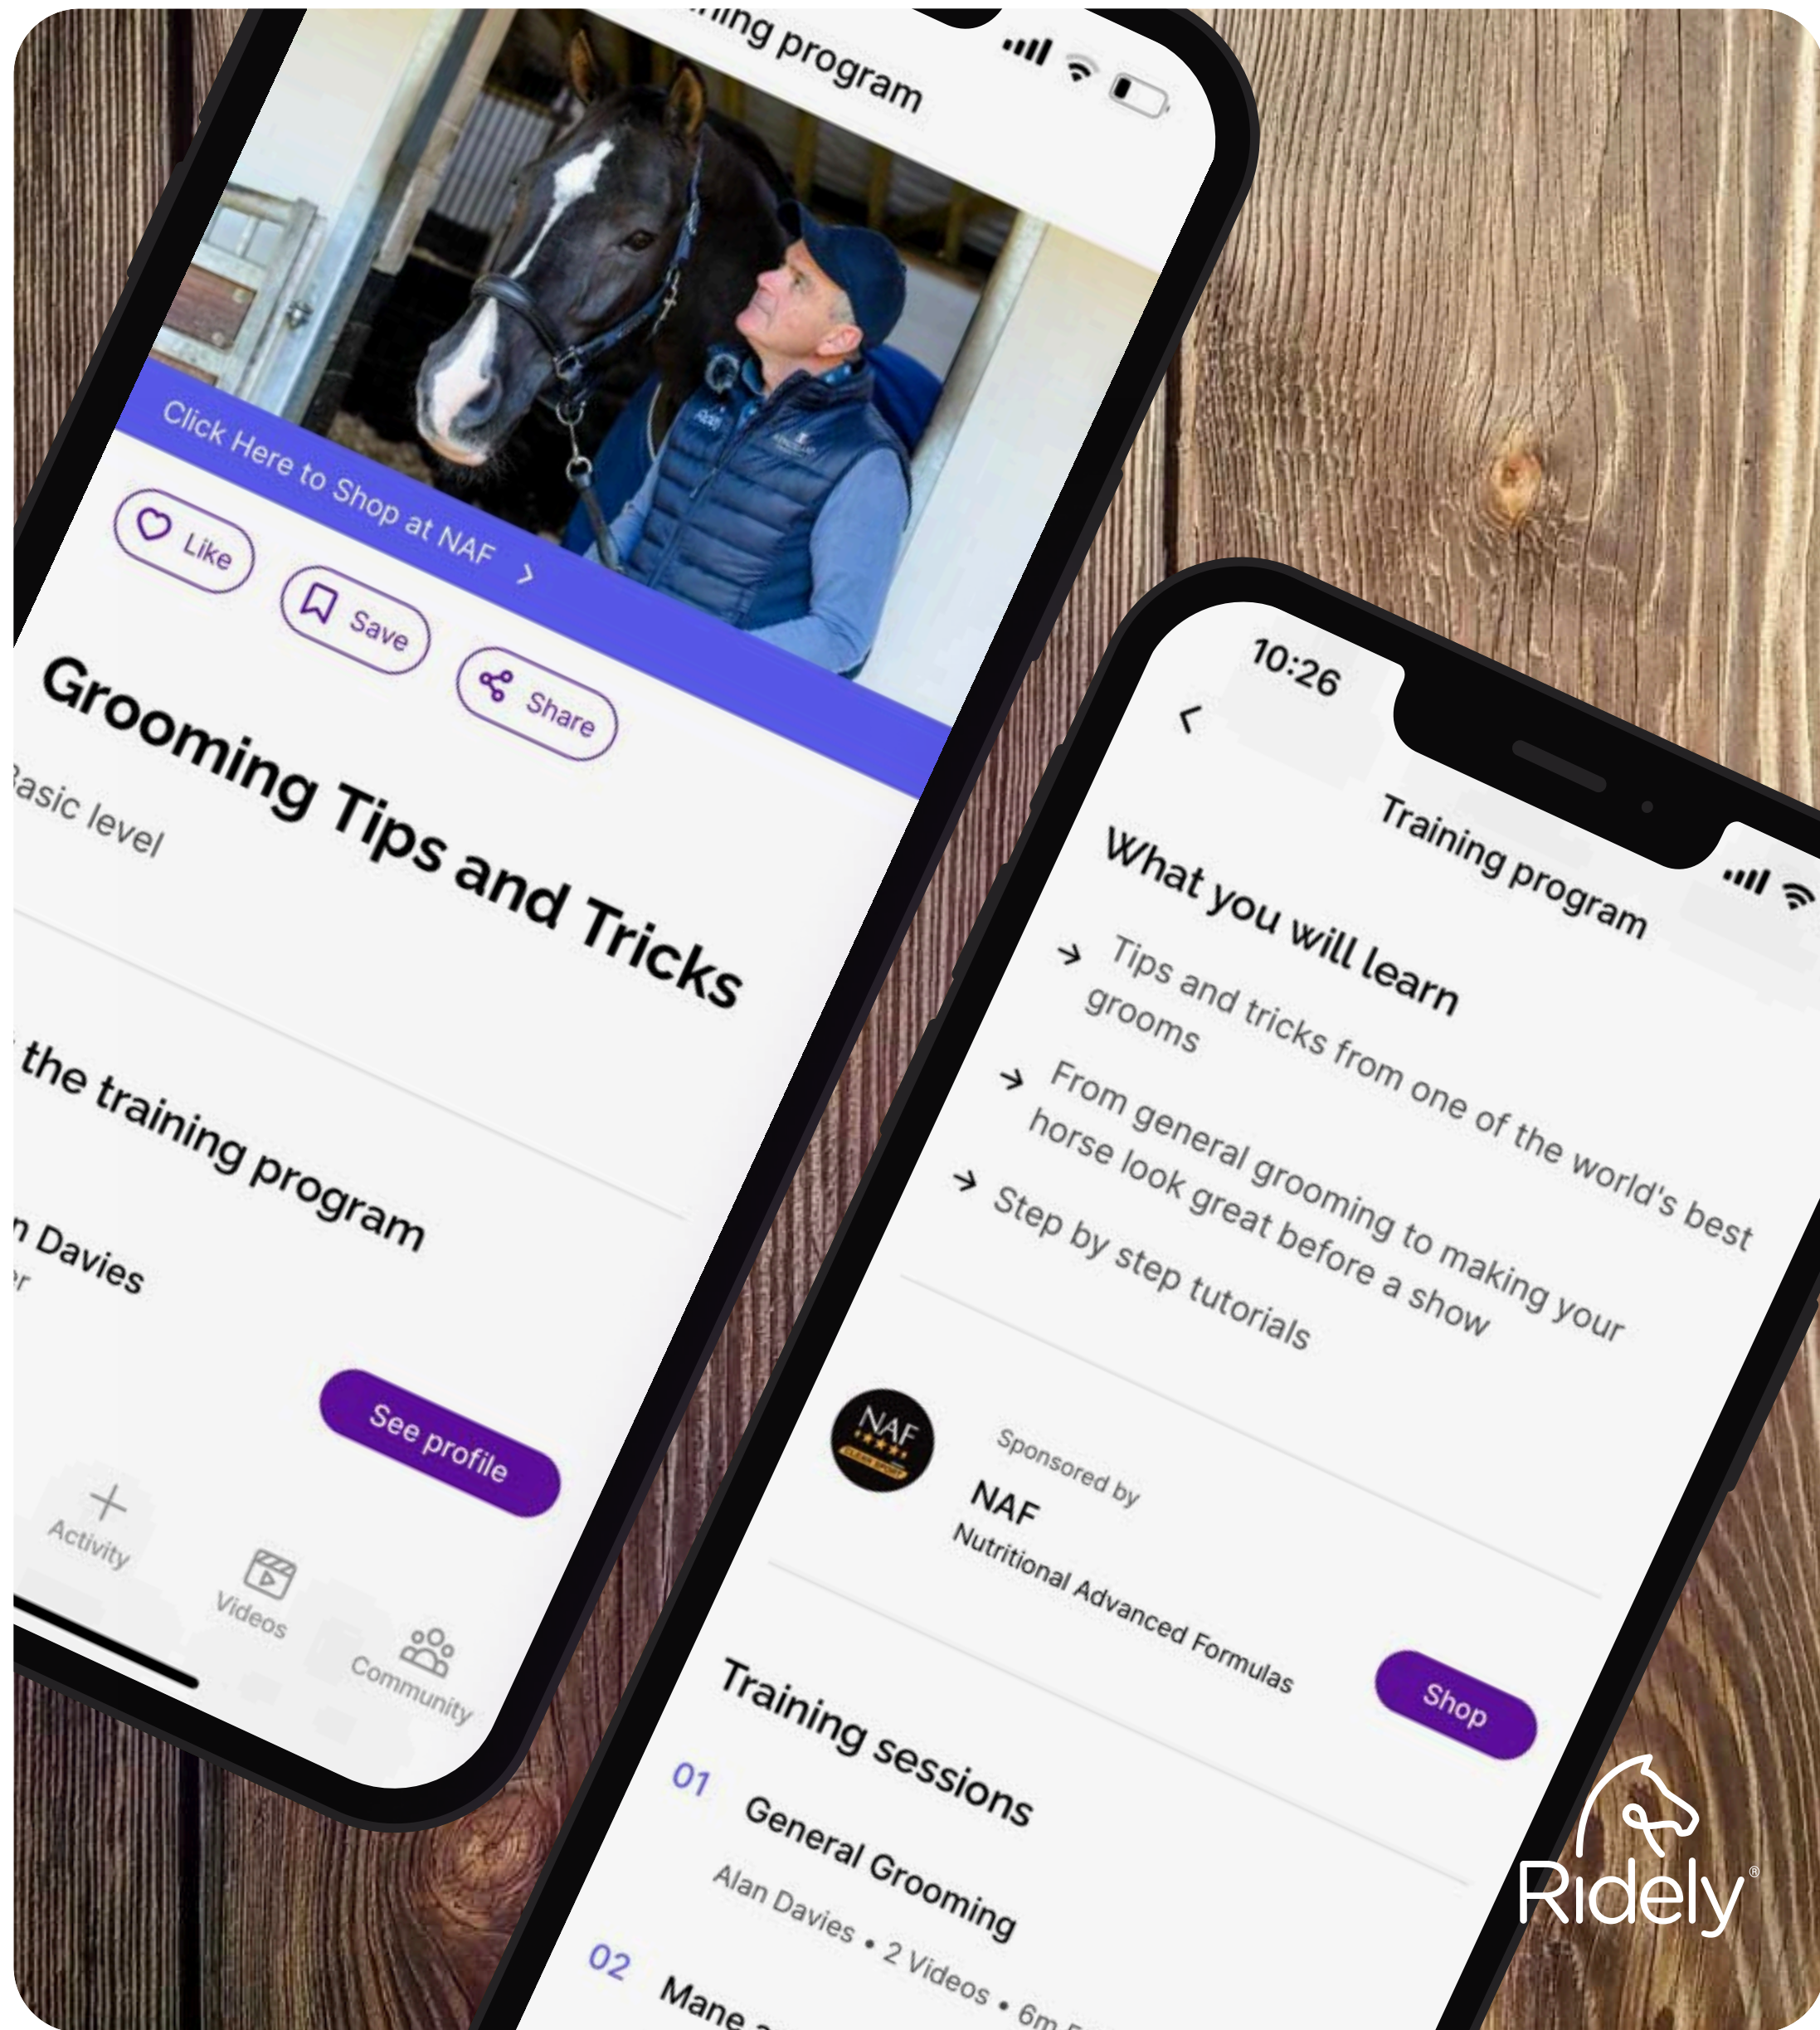

✔ **Trusted content**

Developed by equestrians and backed by Olympians. Ridely Academy's library of trusted, high quality content and features support riders from beginners through to advanced.

✔ **Tools to empower teachers**

All-in-one platform for trainers to reach and engage a global community of students and manage interaction. Trainers can offer personalized programs, specific groups and quizzes to set a standard of learning.

Structured Training Programs

Structure your own Training Programs where you pick from our content or create your own

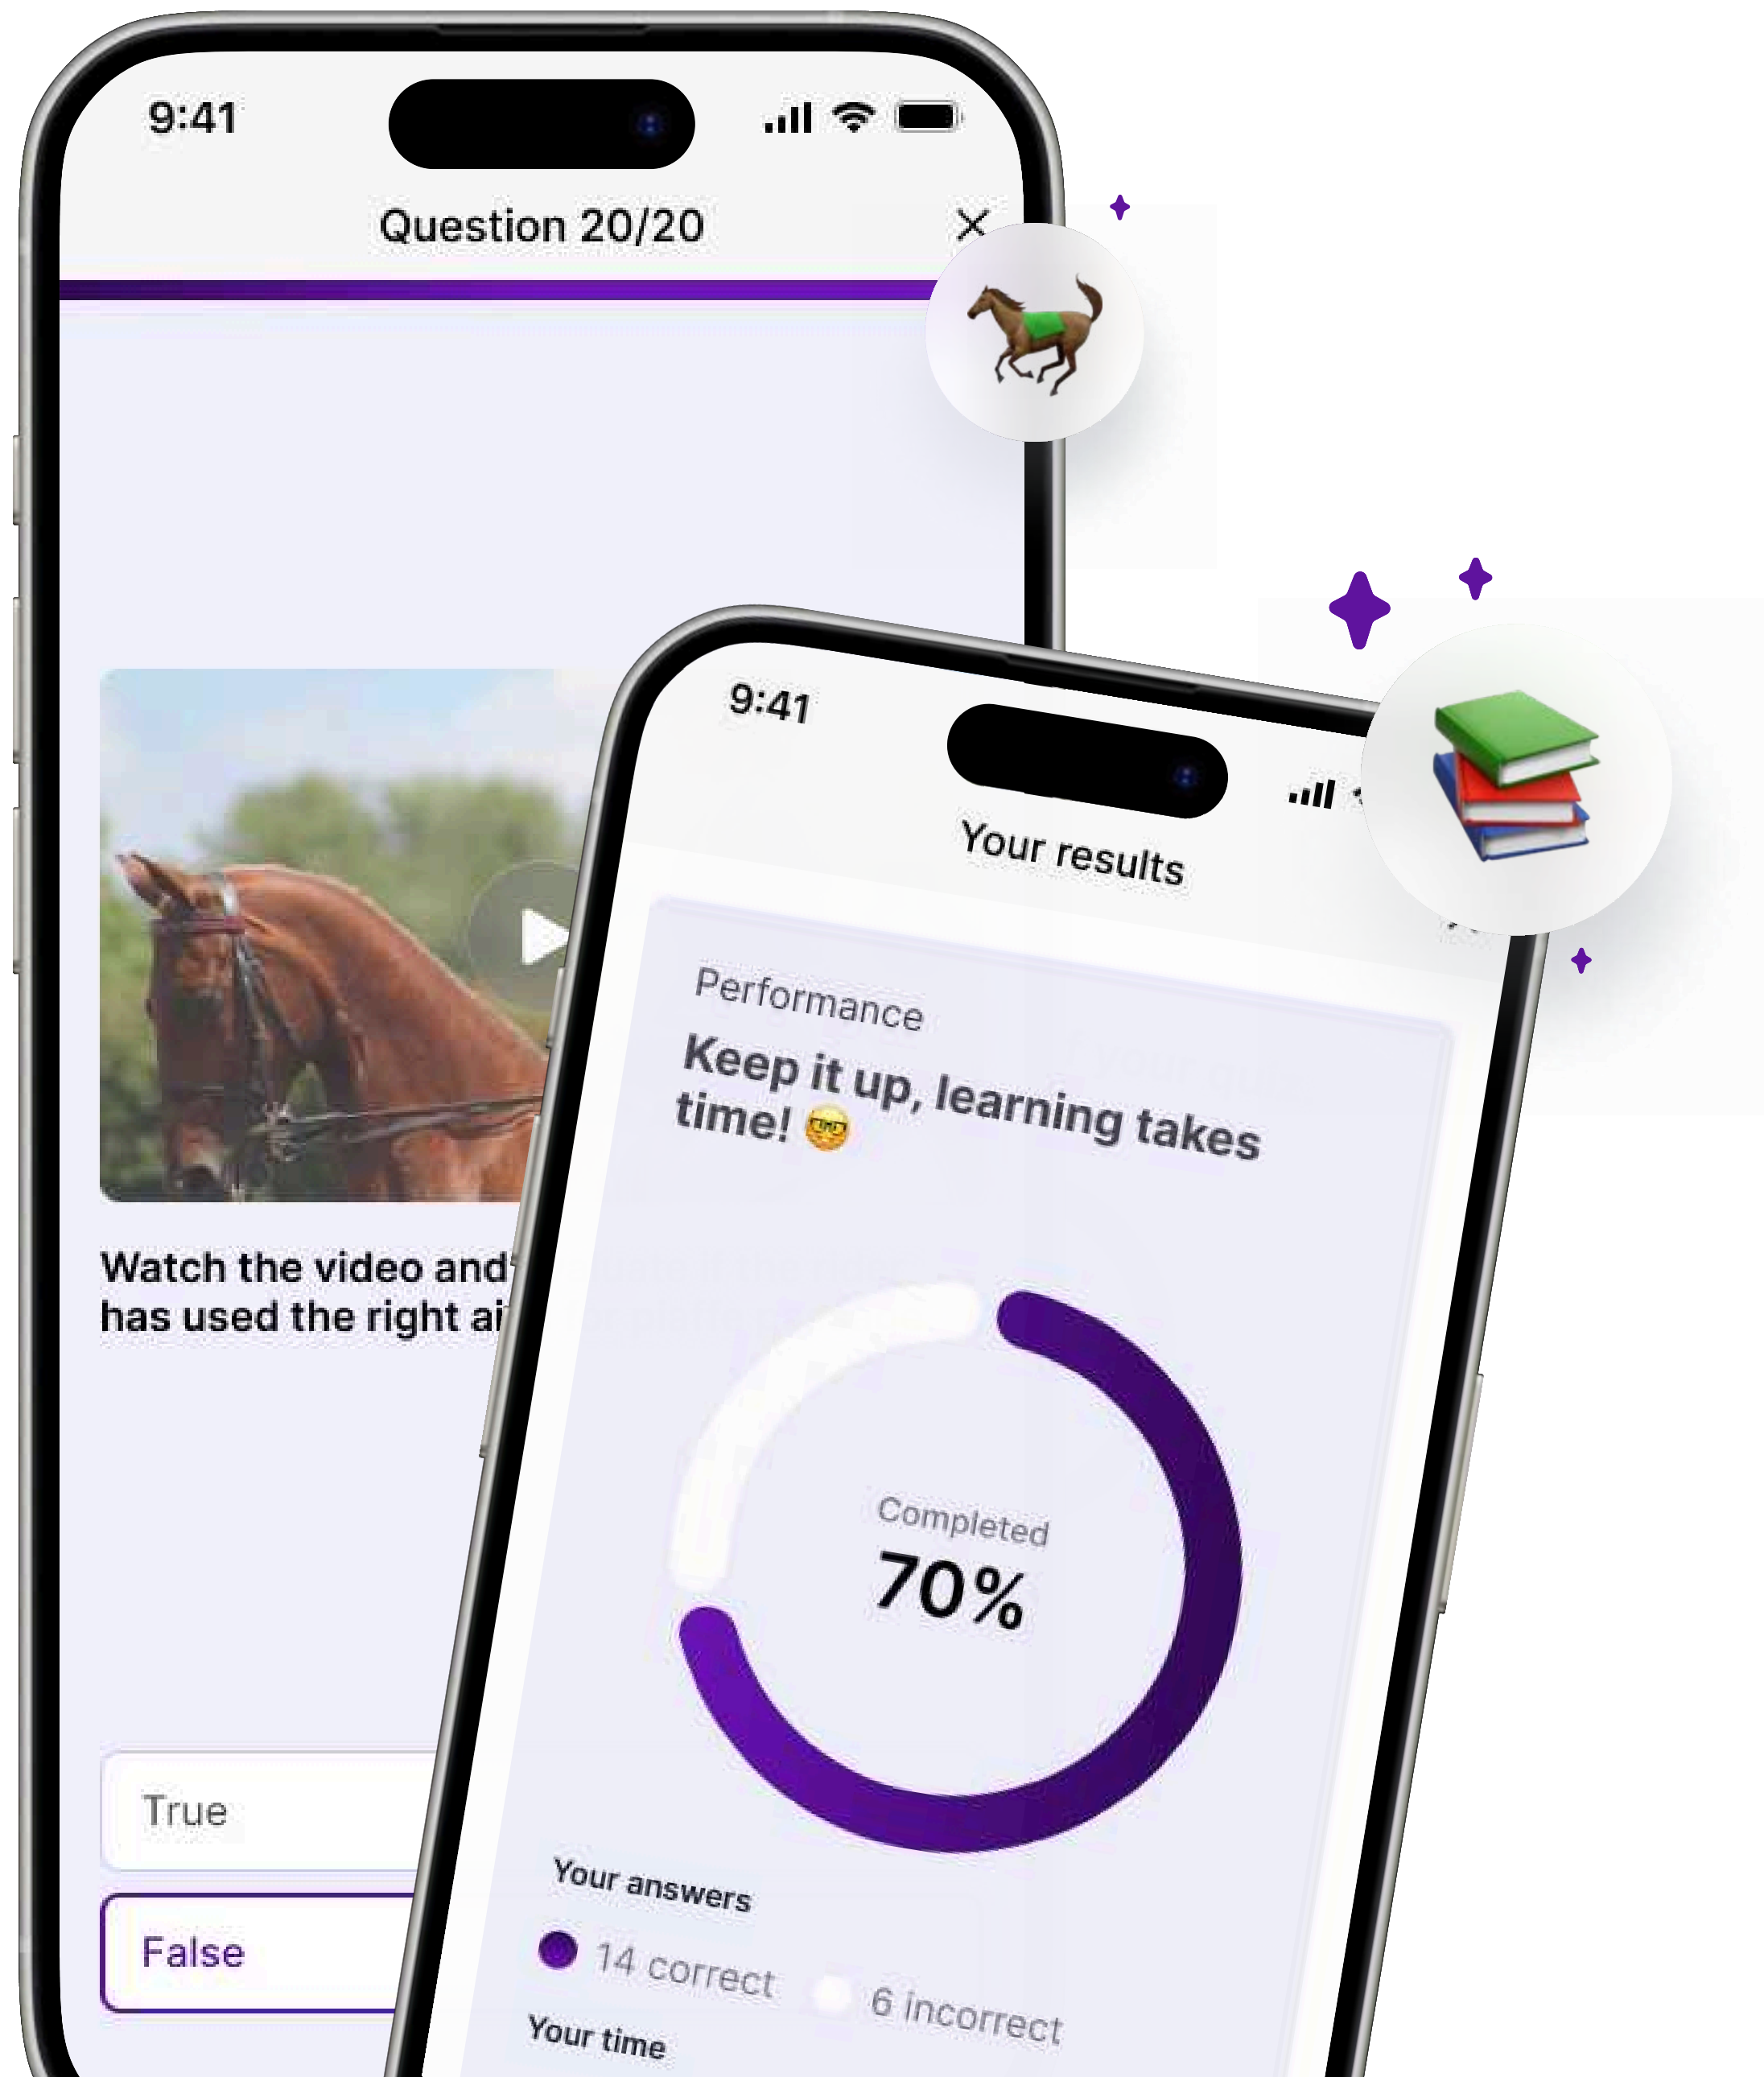

Specialised Group(s)

Your own private group to communicate, give and receive feedback, upload videos and materials, and keep students updated

Learning Outcomes

Include quizzes to make sure the your students have learned the most important parts. We can report back on user assessment

Quizzes to ensure learning outcomes

Make sure your students learn the most important parts by assigning them quizzes to test their knowledge.

FLEXIBILITY ⌵

Enhance your live training classes with Ridely Academy

Ridely Academy provides teachers and students with multiple solutions in one streamlined platform.

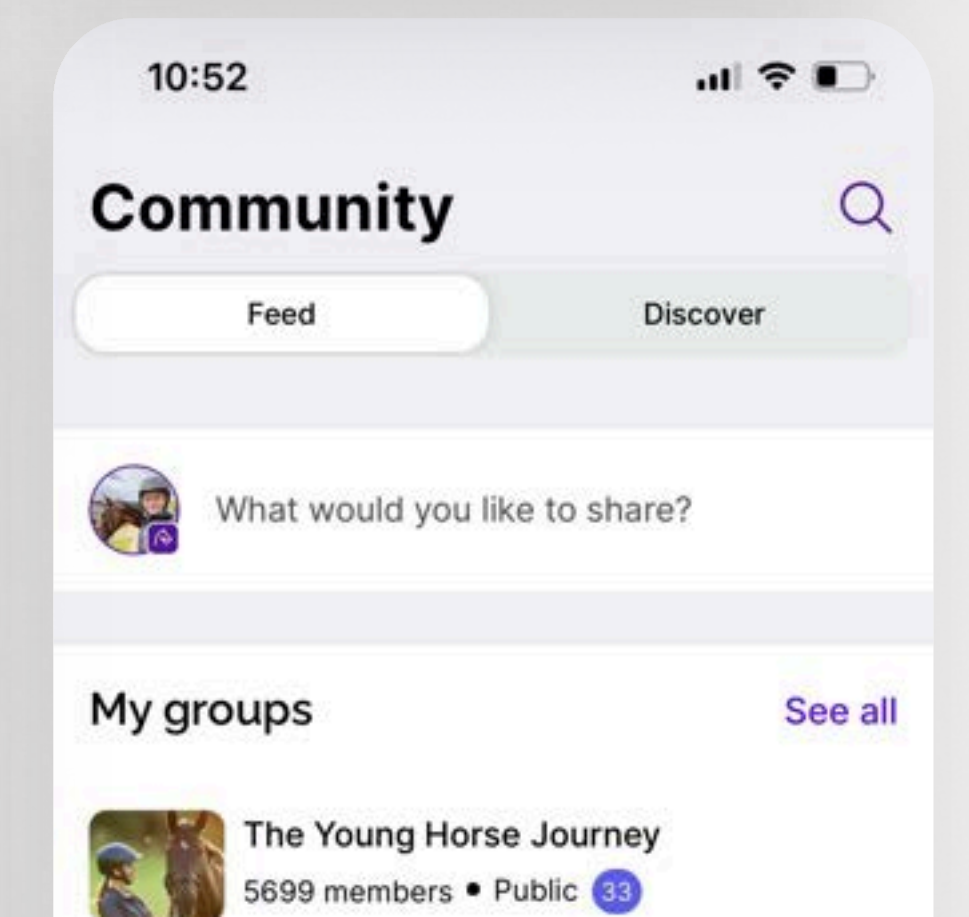

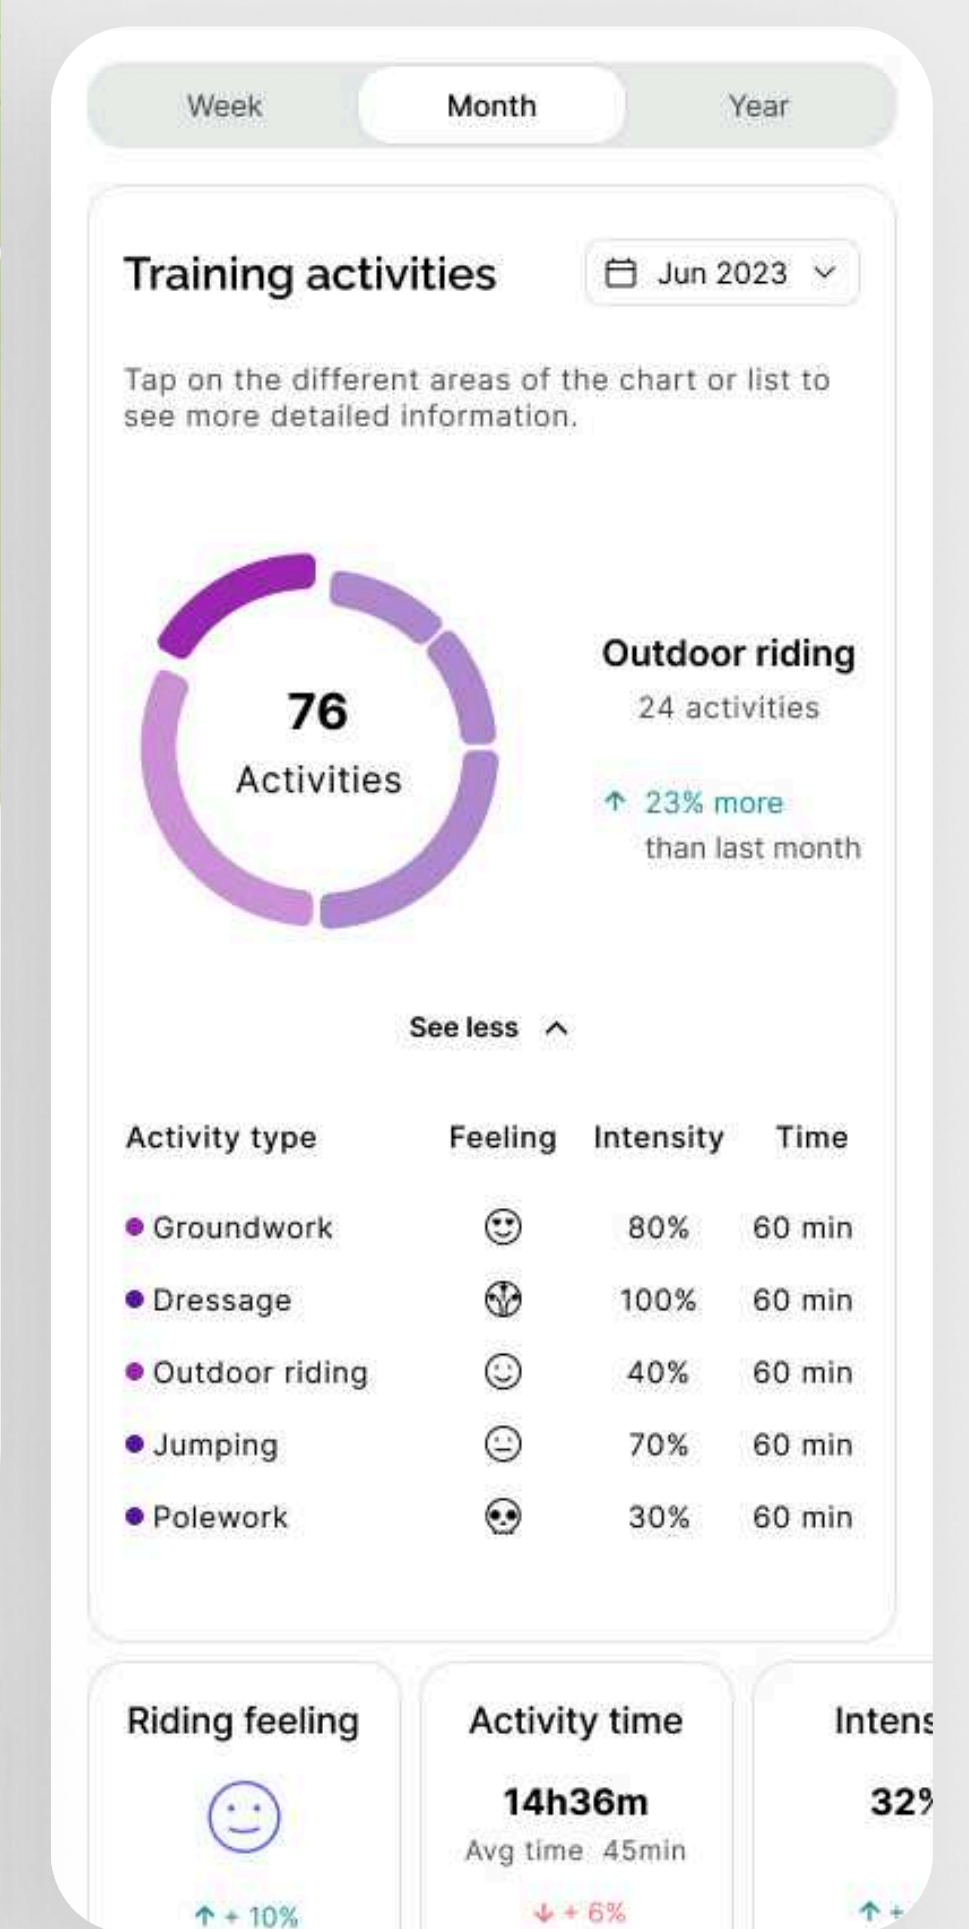

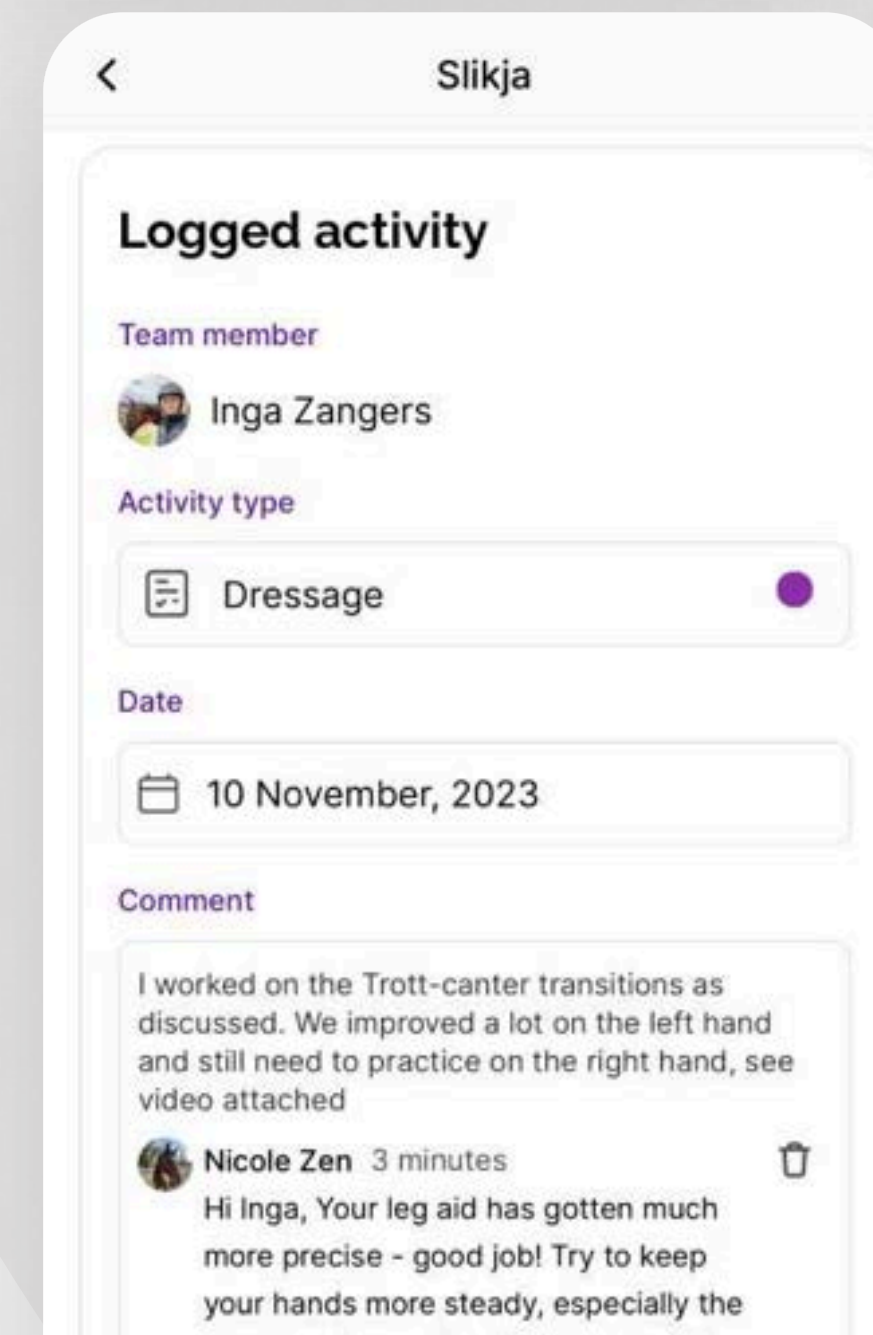

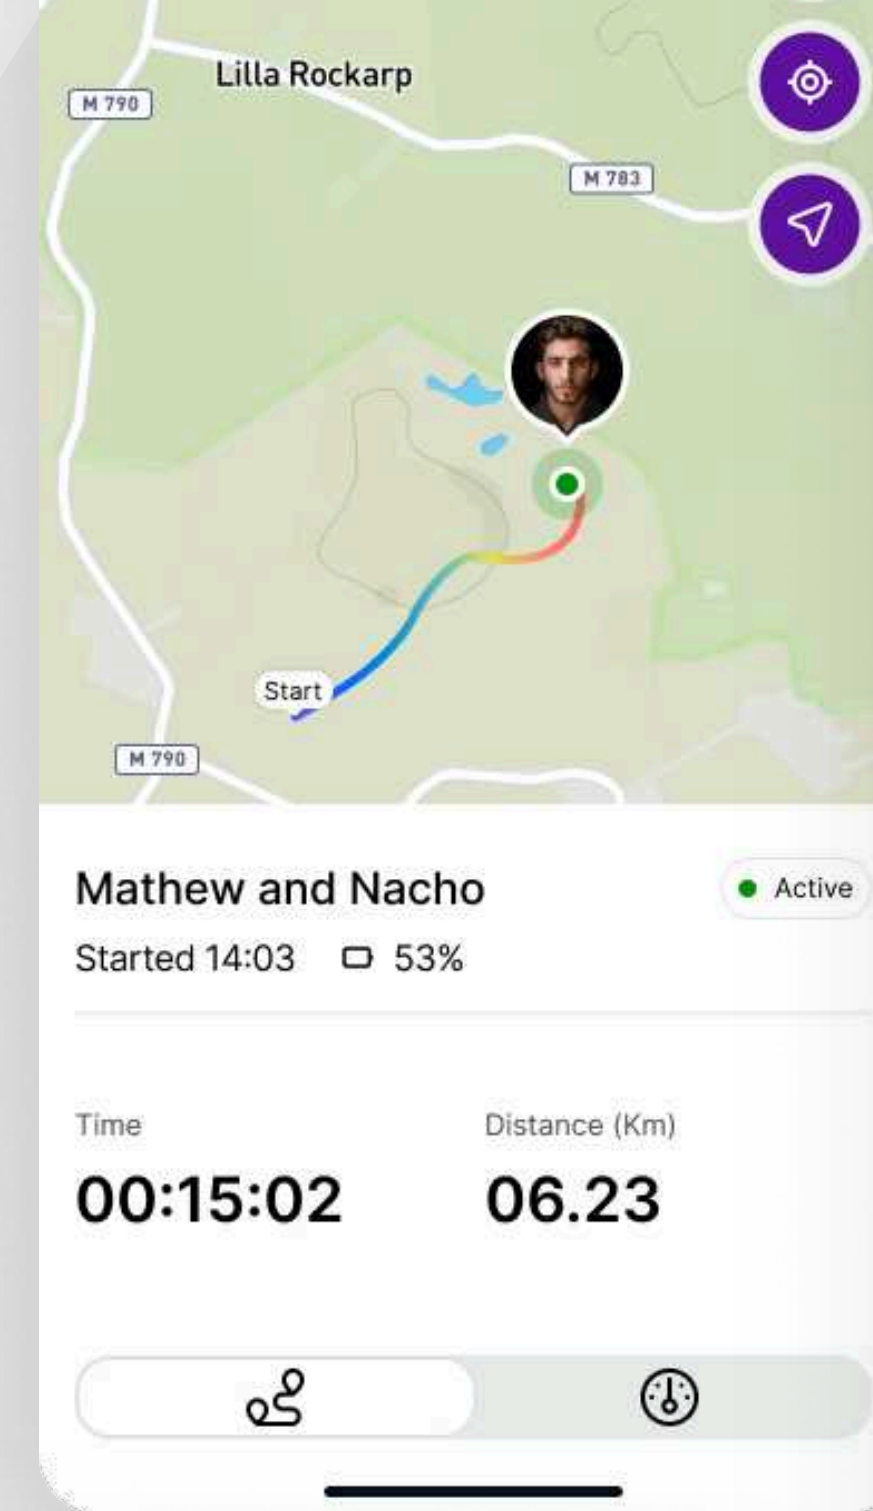

Compatible with a range of display options to suit your live training sessions, as well as your remote training needs.

Smart mobile devices, watches, laptops, desktops and projectors or screen casting available.

➔ More features

Features are developed based on real rider feedback and data, ensuring we create exactly what riders truly want and need.

- ✔ **RideSafe Tracker** - the ultimate ride tracker with live sharing and a built in safety tool
- ✔ **Track progress** - calendar for logging, planning and sharing student progress with their trainer
- ✔ **Training statistics** - progress monitors and achievements
- ✔ **Safe and inclusive Community Groups** - discuss in a safe environment of likeminded equestrians

Favorite horse app!
This app helps me keep track of what I have done/plan to do for the week. I really like that I can change how the workout was, the difficulty, and time. The note section let's more

4.6 rating on AppStore

What schools and students that partner with Ridely say

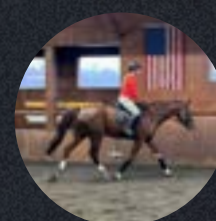

Johnson & Wales University is a proud partner of Ridely

“

I have been able to use the Ridely app for class, create a riding schedule for my two horses, and plan and reflect on each ride really easily.

It is also a great place to make a list of goals with the planned activities in the calendar feature.

I was very pleased with the video content they provided, especially the exercises and tips for accomplishing certain movements in dressage and equitation.

Lexi Blais, student
Johnson & Wales University

“

I usually assign the students 3-4 videos a week, different topics each week - there are so many great videos in Ridely. Many of the exercises we discuss in class and then the students can practice them.

This is so useful - it is such a great learning and educational tool. They are able to use their visual, auditory and kinesthetic learning styles for this.

This helps create creativity and innovative teaching techniques and is so inspiring for myself and the students.

Feedback from the students:

- Very engaging
- Helps visualize what they are doing and then you can try it yourself
- Good for developing terminology and training system
